Project Manager

Professional Engineer licensure | 10+ years of experience

Lead building projects and the teams responsible for delivering them. You will combine technical oversight with responsibility for scope, schedules, fees, and client communication, helping the team provide thoughtful engineering and dependable service.

What you will do

- Manage projects from scope development and design through construction administration.
- Establish work plans, coordinate staffing, and monitor schedules and project budgets.
- Lead client and design team communication, including decisions that affect scope, fees, and delivery.
- Direct engineering and BIM efforts and coordinate reviews at appropriate project milestones.
- Mentor staff, delegate effectively, and provide clear feedback.
- Contribute to proposals, additional service requests, and the development of long-term client relationships.

What you bring

- Professional Engineer (PE) licensure and 10+ years of relevant structural engineering experience in buildings.
- Demonstrated experience managing projects, coordinating teams, and maintaining client relationships.
- Strong technical judgment and an understanding of design, documentation, and construction administration.
- The ability to manage competing priorities, communicate expectations, and support the development of others.

If you're passionate about shaping the built environment and contributing to projects that stand the test of time, we want to hear from you. Our office is based in Center City, Philadelphia.

This is an exciting time to join our growing firm and make an impact!

Email your resume to **mail@keasthood.com** and include the position title in the subject line.
Our office is located at **1635 Market Street, Suite 1705, Philadelphia, PA 19103**.

Keast & Hood is an equal opportunity employer. We welcome applicants with different backgrounds and perspectives who share our commitment to thoughtful engineering and respectful collaboration.
