Structural Engineer 1

Professional Engineer licensure | 4-8 years of experience

Take responsibility for defined portions of building projects while broadening your technical experience. You will perform analysis and design, coordinate your work with the project team, and develop solutions with guidance from senior engineers and project managers.

What you will do

- Analyze and design structural components and systems for new and existing buildings.
- Prepare calculations and coordinate drawings and details with BIM modelers.
- Evaluate existing conditions and contribute to investigation reports and repair recommendations.
- Coordinate assigned work with architects, consultants, and contractors.
- Perform construction administration tasks and assist less experienced staff.

What you bring

- Professional Engineer (PE) licensure and 4-8 years of relevant structural engineering experience in buildings.
- Experience designing with common structural materials and applying building codes and design standards.
- Proficiency with structural analysis and design software (RAM), and familiarity with Revit.
- The ability to organize your work, communicate technical ideas, and follow through on project commitments.

If you're passionate about shaping the built environment and contributing to projects that stand the test of time, we want to hear from you. Our office is based in Center City, Philadelphia.

This is an exciting time to join our growing firm and make an impact!

Email your resume to **mail@keasthood.com** and include the position title in the subject line.
Our office is located at **1635 Market Street, Suite 1705, Philadelphia, PA 19103**.

Keast & Hood is an equal opportunity employer. We welcome applicants with different backgrounds and perspectives who share our commitment to thoughtful engineering and respectful collaboration.
